

- **Section of machine tools:**

All kinds of metal cutting and pressure shaping machine tools, numerical control machine tools (machining center) and matching products, relevant dedicated equipment and technology of each industry.

- **Section of universal devices:**

Welding, cutting equipment and technology, compressor, electrical machinery, lift, voltage transformer, mutual inductor, etc.

- **Section of industrial automatization:**

The automatic control system of robot and transmission device; multi-function equipment, technology of moving systems; digital equipment, etc.

- **Section of dedicated equipment for boiler and fluid machinery:**

Fluid equipment and dedicated equipment, such as boiler, pressure vessel, pipeline, pump, valve, etc.

- **Section of the measuring tool and cutting tool:**

Mould, measuring tool, cutting tool, industrial facilities, pipe tool, hardware & tools, tool accessories, etc.

- **Section of process technology:**

Metal finish machining, precision casting, forging equipment and craftsmanship, industrial harmless control and technology diagnosing, production and utilization of composite and recycled material, etc.

- **Section of instrument and meter:**

Various kinds of instrument and meter, laser equipment, optic equipment, equipment and technology of energy efficiency and radiating safety.

- **Section of electronic technology:**

Electronic application system, and new material, new product, new craftsmanship and so on for electronic technology.

- **Section of engineering machinery and heavy-duty equipment:**

- **Communication Equipment Manufacturing Technology Section:**

- **Section of machinery for cereals, oil and foodstuffs:**

- **Section of agricultural machinery:**
